Monthly Indicators

November 2022

Housing affordability continues to be a major roadblock for market participants, with mortgage rates more than double compared to this time last year. Buyers are delaying home purchases in hopes rates will drop, while many sellers are holding off on listing their homes due to weakening buyer demand, unwilling to trade in their current lower rates for significantly higher borrowing costs on their next property. As a result, existing-home and pending home sales have continued to slow as we move into winter.

New Listings were down 18.0 percent for single-family homes and 24.6 percent for condominium properties. Closed Sales decreased 25.1 percent for single-family homes and 29.6 percent for condominium properties.

The Median Sales Price was up 1.4 percent to \$669,000 for single-family homes and 32.3 percent to \$518,000 for condominium properties. Months Supply of Inventory increased 58.3 percent for single-family units and 50.0 percent for condominium units.

With home sales down, nationwide housing inventory was at 3.3 months' supply heading into November, up from 2.4 months from this time last year, according to the National Association of REALTORS®. Although buyers have more options to choose from, home prices remain high, and soaring borrowing costs have caused monthly payments to increase significantly, with the average homebuyer paying 77% more on their loan per month compared to the same period a year ago, according to Realtor.com.

Housing Affordability Index

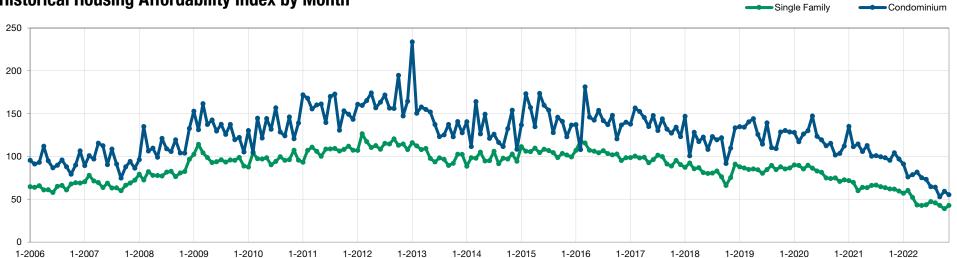

This index measures housing affordability for the region. For example, an index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.

A research tool provided by the Massachusetts Association of REALTORS®

Closed Sales	A measure of home sales that were closed to completion during the report period.	
Median Sales Price	A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point.	
Housing Affordability Index	A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and average income by county.	
Inventory of Homes for Sale	A measure of the number of homes available for sale at a given time. Once a listing goes pending, sold or is taken off the market, it is no longer considered "active." The availability of homes for sale has a big effect on supply-demand dynamics and home prices.	
Months Supply of Inventory	The inventory of homes for sale (at the end of a given month) divided by the average monthly pending sales from the last 12 months.	
Final Days on Market Until Sale	A measure of how many calendar days pass between when a listing becomes active (not pending) for the last time to the last time it goes pending directly before it is sold. A pending sale is defined as something classified as Pending, Active with a Flag, Contingent or Under Agreement.	
Cumulative Days on Market Until Sale	A measure of the average number of calendar days that pass from when a listing is first listed to when a property goes into the last pending status before it is sold.	
Percent of Original List Price Received	This is calculated as Total Sold Dollars (all sold prices added together) divided by Total Original Price (all original list prices added together).	
New Listings	A measure of how much new supply is coming onto the market from sellers. It is calculated by counting all listings with a list date in the reporting period.
